

**APPROACH: Integrated, socially acceptable, sustainable**  
**PLANNING: Current practice, planned ideas, long term**

Aquaterra will be preceded by a wide-ranging research project on delta issues and responses, the results of which will form the basis for the conference case studies. Along with the output of the discussions between delegates in the case studies, the results will also be processed in conference conclusions and the Aquaterra '09 Statement on Best Practices and Approach in delta development.

# PROGRAMME STRUCTURE AQUATERRA 2009 - 2nd WORLD FORUM ON DELTA AND COASTAL DEVELOPMENT

Delta case	Delta case	Delta case	Delta case
9	10	11	12

- Hosted presentations
- Matchmaking
- Round tables
- Tradeshow

## REVIEW & RECOMMENDATIONS

February 12, 2009

Plenary keynote(s)

- conference theme in review

Plenary sessions on five themes moderated by industry professionals

- conference discussion
- conclusions

Closing Event  
Contributions / Statement

### Questions to delegates

What is the current response regarding your delta to the drivers mentioned here? What ideas for the future are currently in planning and what is your (organisations) vision for the long term? What difficulties do you anticipate in terms of achieving integration, social acceptability and sustainability?

### AQUATERRA – A 'WORKING CONFERENCE'

The conference starts with an overview, views on major themes and the results of the Delta Research project. The outcomes will then be further analysed within delta case studies, resulting in conference recommendations and the Aquaterra '09 Statement.
